## Laser Skin Resurfacing what to expect

Laser skin resurfacing is a treatment to reduce facial wrinkles and skin irregularities, such as blemishes or acne scars.

The technique directs short, concentrated pulsating beams of light at irregular skin, precisely removing skin layer by layer. This popular procedure is also called lasabrasion, laser peel, or laser vaporization.

### Who Is a Good Candidate For Laser Resurfacing?

If you have fine lines or wrinkles around your eyes or mouth or on your forehead, shallow scars from acne, or non-responsive skin after a facelift, then you may be a good candidate for laser skin resurfacing.

If you have acne or if you have very dark skin, you may not be a candidate. This technique is also not recommended for stretch marks. You should discuss whether laser resurfacing is right for you by consulting with the doctor before having the procedure done.

### How Does Laser Skin Resurfacing Work?

The two types of lasers most commonly used in laser resurfacing are carbon dioxide (CO2) and erbium. Each laser vaporizes skin cells damaged at the surface-level.

#### CO2 Laser Resurfacing

This method has been used for years to treat different skin issues, including wrinkles, scars, warts, enlarged oil glands on the nose, and other conditions. Recovery takes up to two weeks.

#### Erbium Laser Resurfacing

Erbium laser resurfacing is designed to remove surface-level and moderately deep lines and wrinkles on the face, hands, neck, or chest. One of the benefits of erbium laser resurfacing is minimal burning of surrounding tissue. This laser causes fewer side effects -- such as swelling, bruising, and redness - so your recovery time should be faster than with CO2 laser resurfacing. In some cases, recovery may only take one week. Ask your provider how long recovery is likely to take for you.

If you have a darker skin tone, erbium laser resurfacing may work best for you.

If you are concerned with facial wrinkles and skin irregularities, such as blemishes or acne scars, call today and schedule a complimentary consultation to see if Erbium Laser Resurfacing is right for you.

## Erbium Post-Treatment Care

Avoid all alpha hydroxyl and beta hydroxyl products (AHA/BHA), hydroquinone, retinols/retinoids, aspirin, Tazorac, Differin, and Vitamin E products for up to 5 days post treatment.

It may take up to 4 weeks after the peeling, bruising and scabbing have subsided for lesions to disappear and skin tone to lighten. DO NOT PICK OR SCRATCH blisters or scabs as they develop.

Discomfort can be relieved with cool compresses or acetaminophen (Tylenol). DO NOT ingest aspirin or products containing aspirin until complete healing has occurred. To reduce swelling you may apply ice packs to the treated area. Ice should be wrapped in a soft cloth and applied for 10-15 minutes at a time.

When washing your face for the first 1-2 days, do not scrub. Use VisaoMD Restor Gentle Cleansing Gel.

Showers are permitted but prolonged bathing is not advised. You may pat the treated area gently with a soft cloth but DO NOT RUB with a towel or washcloth for at least 3 days or until redness subsides.

Apply a protective ointment to the treated area two or more times daily for 3 to 5 days. This process is critical in keeping the skin hydrated and preventing bacteria from entering the skin.

It is imperative that you use a broad spectrum UVA/UVB sunscreen with and SPF of at least 20 or higher and avoid direct sunlight for at least 7 days post treatment.

Within 48 to 72 hours post treatment, you may experience flaking or peeling. This will generally last 2 to 5 days. DO NOT PICK OR PULL THE SKIN.

Do not have any other facial treatments for at least 2 weeks post treatment.

Avoid swimming and contact sports while the skin is healing. If you experience any adverse reactions to your skin resurfacing treatment area contact Westchase Medspa (813) 749-7143 for instructions on how to care for your reaction.

Do not pick or peel any sores that may develop.

Keep all recommended products on your skin until instructed otherwise by your Westchase Medspa specialist.

### Medical Grade Skin Care products recommended for post treatment:

↑ Restor Gentle Cleansing Gel

↑ Hydra Clear Skin Serum

↑ Rescue Intense Moisture Creme

↑ Recover Tissue Repair Complex

↑ Solar Protect SPF (may be mixed with Rescue Intense Moisture Creme)
