Informed Consent – Lam Probe

Patient Name: _____ Treatment Areas: _____

Westchase Medspa has explained to me that the Lam Probe processes are popular and effective for the cosmetic care of many minor superficial skin irregularities that professional aesthetic therapists encounter on a daily basis. I consent to have the Lam Probe utilized on me for the purpose of the cosmetic treatment (skin lesion) _____ in the following area(s) _____.

As with any cosmetic procedure, the goal is for the esthetic improvement not perfection. Risks associated with the Lam Probe are minimal and may include burns/scabbing, skin discoloration, and scarring, thus it is extremely important to follow home care advice to minimize these risks. I attest that I am unaware of any underlying conditions (e.g. skin cancer or skin diseases). I understand that several factors including skin color, age, ethnicity, hormonal activity, inherited conditions, and other influences may decrease effectiveness of cosmetic treatments.

Please read and initial the following acceptances.

_____ I understand that the Lam Probe treatment uses a very fine disposable needle but does not break the skin. A small amount of electrical current in the form of radio frequency is then applied through this needle to the point of treatment to improve skin lesions. I have been specifically advised that this office has implemented infection control procedures.

_____ I confirm that I have not taken Accutane for at least one year.

_____ I consent to the taking of photographs during the course of my Lam Probe treatment for use in my chart and promotional material.

_____ I certify that I have been fully informed of the nature and purpose of the procedure, expected outcome and possible complications and I understand that no guarantee can be given as to the final result obtained.

_____ I understand compliance with treatment guidelines is crucial for optimum results. I have read and understood all information presented to me before signing this consent. I understand and consent to the policy that I will be charged \$35 for any appointments cancelled with less than 24 hours' notice.

Many factors determine the number and the length of treatment required. The closer you adhere to your treatment schedule, the more effective your treatment will be.

Lamprobe After Care

After treatment with the Lamprobe, the areas treated may feel irritated. Redness and scabbing may also occur. Please follow the below protocols for home care:

- ↑ DO NOT PICK at the areas treated even if scabbing occurs, because prematurely removing the scabs may lead to infection, hyper/hypopigmentation, or scarring.
- ↑ When cleansing the area, avoid using any products other than the recommended VisaoMD. Pat the area dry instead of rubbing to prevent removal of the scab.
- ↑ If instructed to do so, apply anti-biotic ointment and/or VisaoMD Recover to the area multiple times per day to keep the area moist.
- ↑ Use provider's recommended physical sunblock as recommended.
- ↑ Discuss with your provider before using any other skin care products other than the cleanser and sunblock.
- ↑ You may continue all of your other medical grade skincare products, but do not put anything potentially irritating (retinol, acids, exfoliants) directly on the treated spot/lesion/area until instructed to do so.

Contact our office if you have any questions, concerns, problems at (813) 749-7143.

I understand the above instructions. I understand the risks and signs of side effects and complications such as severe redness, swelling, blistering, burns, ulcers, pain, or signs of infection and I will call the office if I have any questions or concerns.
